Up to date Service Logs  
Technical Experience  
Segment Knowledge

## KNOW YOUR INDUSTRY PEST

## KNOW YOUR INDUSTRY PEST

### Cockroach Management Services

Poor sanitation, high moisture, clogged drainages, carton boxes, packaging material, rest rooms, Pantry, Packaging polythene sheets etc. attract American and German cockroaches in plenty and increase infestation zones.

### Fly Management Services

Strong smell of medicinal diluents like sucrose, lactose, hydrogenated vegetable oils etc. attract flies and they start to breed in raw material wastes like corn starch, spilled waste materials like food, receiving material etc.

### Rodent Management Services

Raw material spillage, strong smells, packing materials, poor sanitation, structural & maintenance deficiencies, food sources, electrical cables and wiring attract rats to processing plants and storage areas.

### Mosquito Management Services

Closed work Spaces, indoor plants and outdoor garden, fountains and stagnant water bodies create a conducive breeding zone for mosquitoes that spread malaria, chikungunya, dengue, and encephalitis or brain fever.

### Lizard Management Services

Lizards are attracted to insects hiding in premises and these crawling pests go unnoticed due to availability of crawl spaces and hideouts zones till they can cause serious damages.

### Bird Management Services

The mere presence of birds can be a cause of audit failures or inspections, leading to shutdowns and revenue losses. They transmit over 60 diseases while compromising the air quality and causing serious health and safety concerns.
