High Infestation

Medium to Low Infestation

KNOW YOUR INDUSTRY PEST

Cockroach Management Services

Cockroaches can enter your hotel through the smallest of openings and carry more than 30 kinds of bacteria, trigger allergies and cause food poisoning and pneumonia. Since cockroaches are great hidiers, a few indications there might be and infestation include cast skins, sputum and droppings which only experts can identify.

Fly Management Services

Flies are the most common and dirtiest of the hotel pests. Host of billions of harmful microorganisms, E coli and salmonella, they causes serious illness. Flies thrive on the food and trash found inside hotels. unfortunately, their presence cant be missed by your patrons.

Rodent Management Services

Rodents sneak in to your building even from openings as small as a dime, or hitch hike on food deliveries . They pose serious health threat to your employees & guest as they carry pathogens causing fever,chills, nausea, vomitting, muscle aches, Hantavirus & Lymphocytic Chorio – Meningitis (LCM) known to cause severe complications in pregnant women.

Mosquito Management Services

Indoor plants and outdoor garden and water stagnation creates conducive breeding zones for mosquitoes that spread malaria, chikungunya, dengue, and encephalitis or brain fever.
