

RETAILS & MALLS

Shopping malls and retail outlets become an easy target for pests due to multiple entry points, high footfalls and round the clock stock deliveries, even with the absence of food and grocery. Giving consumers an unhygienic shopping experience while harming your business reputation.

KNOW YOUR INDUSTRY PEST

Cockroach Management Services

Even the newest and most expensive retail and shopping malls that don't handle food and grocery can get infested with vermin very quickly. Resulting in an ideal environment for customers experiencing cockroaches crawling over shopping carts, food trays etc.

Fly Management Services

Presence of flies in shops creates an image of spaces being unhygienic resulting in lowered shopping experience. While malls struggle to create a uniform ambience across its stores and food court zones, flies can cause serious reputational challenges while putting customers health at risk.

Rodent Management Services

Improper handling of food debris in food premises, accumulation of unused articles, improper storage of goods and structural defects such as holes escalate rodent problems. False ceilings provide a good harborage for rodents while damaged false ceiling panels may provide channels for rodents to travel between a false ceiling and the floor.

Bird Management Services

The mere presence of birds can be a cause of audit failures or inspections, leading to shutdowns and revenue losses. They transmit over 60 diseases while compromising the air quality and causing serious health and safety concerns.
